September 24, 2021

Hello DPPO Members,

As discussed at our recent AGM, the DPPO has installed an **AED** (“**Automated External Defibrillator**”) device for all who reside on Duclos Point to use if ever needed. This is the type of device often found in recreational facilities and is used should someone stop breathing. It is used after calling 911 and during the time before the first responders arrive.

Here are the key points for you to know:

1. It is located in the **Northeast Right-of-Way** (see map below);
2. It will be there through all seasons of the year.
3. It is **for anyone** to use in an emergency.
4. It is the **same model the EMS services** use so they can take over when arriving.
5. It provides the user with both **video and audio guidance** when turned on – only open in an emergency.
6. No training is required, although **you should watch the following YouTube video** link:  
<https://www.youtube.com/watch?v=p0IWbEBOYFk>
7. The cabinet is **monitored** and has an **audible alarm** if opened – only open in an emergency.
8. The **green glow** around the cabinet means it is **ready for use**.
9. **Liability Protection** - The Chase McEachern Act (Heart Defibrillator Civil Liability), 2007 - The Ontario government has passed legislation that will protect people from civil liability when they attempt to save a life using an automated external defibrillator (AED).

Please find a moment to wander by the location and become familiar with it. While we never hope anyone will use this, it is there for all should you need it.

On behalf of The Board of Directors

**Duclos Point Property Owners Inc.**

## AED Device Location

**North-East Right-of-Way**  
(Opposite 556 Duclos Point Road)
